Critical Information Summary

Information about the service

The service utilises part of Telstra's 4G and 3G networks (4G=1800MHZ/700MHZ plus 260MHz in selected areas, 3G-850MHz plus 2100MHz in selected areas) with a 4G coverage footprint of 96.5% and a combined 4G and 3G coverage footprint of more than 98.8% of the Australian population covering 1.62 million square kilometres. These mobile plans have access to download speeds of up to 100Mbps on 4G across 95% of the population. 4G devices will enjoy typical download speeds of 2-50Mbps and upload speeds of 1-10Mbps in 4G coverage areas. Handsets not capable of 4G will only receive 3G coverage. Your plan is for a post-paid mobile phone service. It gives you access to our network, a mobile phone number, and lets you make and receive calls, send and receive messages, and access to mobile data. The plans have a minimum term of 12 months. No handset is included, you must bring your own unlocked device. This is a SIM only service.

Data inclusions are calculated on a billing period which starts on the 28th of the month and ends on the 27th of the following month. On initial connection a pro rata value of data is applied to your service. The full data inclusion starts on the 28th of the month. So, if you sign up in the middle of this billing period on a 10Gb plan, you will be allocated 5Gb of data until the 28th of the month when the data inclusion is reset to 10Gb.
