

# Lineshare

## Information About the Service

This is an IP based voice telephony service that is supplied over a fixed broadband internet service and a wired ethernet port that can be used to make national and international calls. Lineshare provides the customer with a PBX hosted by Vonex that utilises a Voice over IP (VoIP) connection to make and receive phone calls. The minimum contract term is 1 month.

The monthly plan fees include one new geographic phone number, all calls to local/national/Australian mobile numbers (excluding plans using Standard or Plus Call Rates), programming of all standard features of a hosted PBX and one hunt group.

## Bundling Arrangements

This service is not conditional on any bundling arrangements, but we do provide other telco services that can be included on one bill. It is recommended that it be used in conjunction with a dedicated Vonex broadband service.

## Mandatory Components and Conditions

It is required that handsets are purchased from and supplied by Vonex. Vonex retail hardware prices include the programming of the hardware to the service.

The internet service may be supplied by any service provider. Each handset extension requires a minimum bandwidth of 100kbps of uncongested upstream and downstream for optimal quality. Call quality may be affected by the internet connection, firewall, hardware, or other matters outside the control of Vonex. This service is not available for telemarketing, call centre function or other similar uses.
